## Germany

### Wohnmichel

Stieglitzweg 2, 14552 Michendorf

Tel. +49-(0)33205-46599, email:

[wohnmichel@wohnmichel.org](mailto:wohnmichel@wohnmichel.org), website: [www.wohnmichel.org](http://www.wohnmichel.org)

Existing since 2014, near Potsdam/Berlin, ca. 40 members, 1,6 ha of land

In Michendorf (southwest of Berlin/adjacent to Potsdam) we have built an intergenerational and ecological community housing project.

We are currently (8/2021) 50 adults and 37 children. On a plot of about 1.7 ha we have built 5 ecological and sustainable houses. As shared rooms and areas we have available: in each

house a communal flat with bath, laundry rooms, cellar, sheds for bicycles, tools and gardening equipment, outdoor playgrounds/space for children, workshops, an organic kitchen garden, a fireplace, a rest garden, a volleyball court and a sauna. A separate community hall is currently being planned. Our solidarity and the sharing of resources lead to synergies in many areas, such as childcare and support for elderly residents. A sustainable and mindful way of living with each other characterises our life together.

### **Serenity Aguatavar**

Camino El Topo 13, 38780 Tijarafe (La Palma)

Tel. +34-602583093, email [serenityaguatavar@gmail.com](mailto:serenityaguatavar@gmail.com), website [serenitylapalma.org](http://serenitylapalma.org)

Existing since 2017 on La Palma, 4-10 members

Serenity is a place where we grow and cook food from our own garden. Our garden spreads over many terraces and gets more and more full of plants and trees. Following the idea of permaculture we close circles as much as possible. We optimize our eco footprint and run the finca in harmony with nature.

Following these principles we build many things on a creative way from some used stuff. We run a solar system with power outlets in all buildings on the finca. Our watering infrastructure is build by many thousand meters of watering pipes and different solutions for different situations. We run a biogas system for producing our own cooking gas. In our killn-pit we produce our own charocal. We produce our own compost and with a worm farm liquid fertilizer. Things like compost toilets and graywater clearing are important peaces in this big puzzle.
